Experience

MAY 2022 - PRESENT

EBizCharge – Senior UX/UI Designer

- Own end-to-end product design across 15+ enterprise ERP products serving thousands of users, spanning web, desktop, and mobile
- Redesigned transaction workflows using hierarchy and interaction improvements, reducing task completion time by up to 50% for core user actions like payment processing
- Built a design system from the ground up that compressed full platform redesigns from 3 months per page to an entire platform refresh in under 3 months – a 10x+ improvement in delivery speed
- Integrate AI tools (ChatGPT, Claude) as a core part of the design workflow – competitive analysis, native pattern research, copy generation, and research synthesis
- Translate ambiguous, data-heavy problem spaces into clear user flows, wireframes, and prototypes that accelerate decision-making across product and engineering
- Drive cross-functional alignment through design reviews and structured feedback loops, partnering with PM and engineering from problem definition through launch
- Bridge design and development by delivering production-ready UI and ensuring high-quality implementation
- Mentor designers and elevate team standards through critique, systems thinking, and best practices

DECEMBER 2018 - MAY 2022

JNR Incorporated – Product Designer

- Led end-to-end UX/UI design for a SaaS platform serving 8 Fortune 500 clients including AT&T, Mazda, Honda, and Toshiba
- Designed and launched a scalable onboarding platform capable of supporting 100,000+ users and millions of claims and payment fulfillments
- Translated complex business logic into intuitive workflows, improving usability and supporting better decision-making across enterprise clients
- Defined product requirements through user research, experimentation, and iterative feedback, contributing to measurable UX improvements
- Presented design concepts and prototypes directly to Fortune 500 stakeholders, driving feedback-driven iteration and client alignment
- Built scalable design patterns to ensure consistency and accelerate development across a multi-client product environment
- Collaborated with engineering to deliver scalable solutions and improve time-to-market
- Conducted UX research using analytics and user insights to inform product direction and iteration

MARCH 2015 - DECEMBER 2018

JNR Incorporated – Frontend Engineer

- Led design and frontend development of responsive web experiences, translating user needs into scalable, high-performing interfaces
- Built and maintained frontend architectures using modern frameworks, developing a strong understanding of technical constraints and system design
- Partnered with marketing and cross-functional teams to design and optimize user journeys, using A/B testing and analytics to improve engagement and conversion
- Designed and developed high-impact landing pages, strengthening expertise in user behavior, interaction patterns, and conversion-focused design
- Owned implementation from concept through deployment, bridging design and engineering and ensuring high-quality, production-ready outcomes
- Created reusable components and templates, introducing early design system thinking to improve consistency and development efficiency
- Built and integrated end-to-end digital experiences, including CMS and CRM systems, gaining exposure to complex, real-world product ecosystems
-

Skills

Design and UX Methodologies

User-Centered Design, Sketching, User Flows, Wireframes (Lo/Hi-Fi), Interactive Prototypes, Design Systems, Usability Testing

Frontend and Implementation

HTML5, CSS/SCSS, Flexbox, Bootstrap, Responsive Design, Frontend Architecture, Production-Ready UI Implementation

Tools and Applications

Figma, Zeplin, Adobe Suite (XD, Photoshop, Illustrator, InDesign, Lightroom), HubSpot, MailChimp, HotJar, Intercom. Salesforce

Collaboration and Process

Agile (Scrum, Kanban, Sprints), Cross-Functional Collaboration, Stakeholder Alignment, Feedback Loops

Education

Mt. San Antonio College – Web and Graphic Design

University of California, Riverside – Computer Engineering
